

## Dec China on the move

### New Shanghai Office Inauguration has proved to be a good opportunity to share best practice and deepen the professional network

Dec Group is pleased to share moments of the official opening of our new, modern and bigger offices in Shanghai.

On March 20, 2018, Dec China celebrated their office inauguration with an official opening ceremony and a journey through technical presentations during which safe and efficient pharmaceutical and chemical manufacturing solutions have been demonstrated. The event brought together customers, partners and the Dec team including both co-founders, Yves and Frederic Dietrich. We also had the honor to welcome Mr Erwin Lüthi, Swiss Deputy Consul General in Shanghai, who attended the official ceremony.

This first seminar was a great success. It has gathered many customers and prospects from different industries interested in our innovative solutions. Our technical experts presented PTS based powder conveying and reactor charging under safe conditions, Dec's 4th generation fluid jet mill technology MC DecJet and the manipulation of sterile and/or toxic products under high containment providing full protection of both environment and product. Our technical presentations have generated much interest and sparked a lot of curiosity.

Nicolas Godde during the opening speech of the professional seminar

Frederic Dietrich presenting fully integrated complex manufacturing solutions in form of case studies.

The professional seminar has generated lots of interest
